happybiRthday

Bohdan B. Khomtchouk

2017-08-12

`happybiRthday` is an R package to essentially do one of two things:

1) Congratulate your friend with the birthday of their Github package(s)
2) Toast yourself! (to the birthday of your own Github package(s))

```r
library(happybirthday)
celebrate("Bohdan-Khomtchouk")
```
