

# Package ‘micar’

April 10, 2019

**Version** 1.1.1

**Title** 'Mica' Data Web Portal Client

**Depends** R (>= 3.0.0), httr

**Imports** jsonlite

**Suggests** knitr

**Description** 'Mica' is a server application used to create data web portals for large-scale epidemiological studies or multiple-study consortia. 'Mica' helps studies to provide scientifically robust data visibility and web presence without significant information technology effort. 'Mica' provides a structured description of consortia, studies, annotated and searchable data dictionaries, and data access request management. This 'Mica' client allows to perform data extraction for reporting purposes.

**License** GPL-3

**URL** <https://www.obiba.org/> <https://www.obiba.org/pages/products/mica/>  
<https://doi.org/10.1093/ije/dyx180>

**BugReports** <https://github.com/obiba/micar>

**RoxygenNote** 6.1.1

**VignetteBuilder** knitr

**Encoding** UTF-8

**NeedsCompilation** no

**Author** Yannick Marcon [aut, cre] (<<https://orcid.org/0000-0003-0138-2023>>),  
OBiBa group [cph]

**Maintainer** Yannick Marcon <yannick.marcon@obiba.org>

**Repository** CRAN

**Date/Publication** 2019-04-10 17:22:46 UTC

<b>Index</b>	<b>18</b>
--------------	-----------

**mica.dar** *Get a data access request*

### Description

Get a specific data access request.

### Usage

```
mica.dar(mica, id)
```

### Arguments

<b>mica</b>	A Mica object
<b>id</b>	Data access request identifier

### See Also

Other data access requests functions: [mica.dar.actions](#), [mica.dar.amendment.form](#), [mica.dar.amendment.history](#), [mica.dar.amendments.history](#), [mica.dar.amendments](#), [mica.dar.amendment](#), [mica.dar.form](#), [mica.dar.history](#), [mica.dars](#)

## Examples

```
## Not run:  
m <- mica.login("someuser", "somepassword", "https://mica-demo.obiba.org")  
mica.dar(m, "12345")  
mica.logout(m)  
  
## End(Not run)
```

---

mica.dar.actions      *Get data access request actions*

---

## Description

Get the actions history of a specific data access request.

## Usage

```
mica.dar.actions(mica, id, df = TRUE)
```

## Arguments

mica	A Mica object
id	Data access request identifier
df	Return a data.frame (default is TRUE)

## See Also

Other data access requests functions: [mica.dar.amendment.form](#), [mica.dar.amendment.history](#), [mica.dar.amendments.history](#), [mica.dar.amendments](#), [mica.dar.amendment](#), [mica.dar.form](#), [mica.dar.history](#), [mica.dars](#), [mica.dar](#)

## Examples

```
## Not run:  
m <- mica.login("someuser", "somepassword", "https://mica-demo.obiba.org")  
mica.dar.actions(m, "12345")  
mica.logout(m)  
  
## End(Not run)
```

---

`mica.dar.amendment`      *Get a amendment*

---

## Description

Get a specific data access request amendment.

## Usage

```
mica.dar.amendment(mica, pid, id)
```

## Arguments

<code>mica</code>	A Mica object
<code>pid</code>	Data access request identifier
<code>id</code>	Amendment identifier

## See Also

Other data access requests functions: [mica.dar.actions](#), [mica.dar.amendment.form](#), [mica.dar.amendment.history](#), [mica.dar.amendments.history](#), [mica.dar.amendments](#), [mica.dar.form](#), [mica.dar.history](#), [mica.dars](#), [mica.dar](#)

## Examples

```
## Not run:  
m <- mica.login("someuser", "somepassword", "https://mica-demo.obiba.org")  
mica.dar.amendment(m, "12345", "12345-1")  
mica.logout(m)  
  
## End(Not run)
```

---

`mica.dar.amendment.form`  
*Get the data access request amendment form*

---

## Description

Get the data access request amendment form.

## Usage

```
mica.dar.amendment.form(mica)
```

**Arguments**

<code>mica</code>	A Mica object
-------------------	---------------

**See Also**

Other data access requests functions: [mica.dar.actions](#), [mica.dar.amendment.history](#), [mica.dar.amendments.history](#), [mica.dar.amendments](#), [mica.dar.amendment](#), [mica.dar.form](#), [mica.dar.history](#), [mica.dars](#), [mica.dar](#)

**Examples**

```
## Not run:  
m <- mica.login("someuser", "somepassword", "https://mica-demo.obiba.org")  
mica.dar.amendment.form(m)  
mica.logout(m)  
  
## End(Not run)
```

---

**mica.dar.amendment.history**  
*Get amendment history*

---

**Description**

Get the history of a specific data access request amendment.

**Usage**

```
mica.dar.amendment.history(mica, pid, id, df = TRUE)
```

**Arguments**

<code>mica</code>	A Mica object
<code>pid</code>	Data access request identifier
<code>id</code>	Amendment identifier
<code>df</code>	Return a data.frame (default is TRUE)

**See Also**

Other data access requests functions: [mica.dar.actions](#), [mica.dar.amendment.form](#), [mica.dar.amendments.history](#), [mica.dar.amendments](#), [mica.dar.amendment](#), [mica.dar.form](#), [mica.dar.history](#), [mica.dars](#), [mica.dar](#)

## Examples

```
## Not run:
m <- mica.login("someuser", "somepassword", "https://mica-demo.obiba.org")
mica.dar.amendment.history(m, "12345", "12345-1")
mica.logout(m)

## End(Not run)
```

**mica.dar.amendments**    *Get amendments*

## Description

Get the list of amendments of a specific data access request.

## Usage

```
mica.dar.amendments(mica, pid, status = NULL, df = TRUE)
```

## Arguments

<code>mica</code>	A Mica object
<code>pid</code>	Data access request identifier
<code>status</code>	Filter by status
<code>df</code>	Return a data.frame (default is TRUE)

## See Also

Other data access requests functions: [mica.dar.actions](#), [mica.dar.amendment.form](#), [mica.dar.amendment.history](#), [mica.dar.amendments.history](#), [mica.dar.amendment](#), [mica.dar.form](#), [mica.dar.history](#), [mica.dars](#), [mica.dar](#)

## Examples

```
## Not run:
m <- mica.login("someuser", "somepassword", "https://mica-demo.obiba.org")
mica.dar.amendments(m, "12345")
mica.logout(m)

## End(Not run)
```

---

`mica.dar.amendments.history`  
*Get amendments history*

---

## Description

Get the history of the amendments of a specific data access request.

## Usage

```
mica.dar.amendments.history(mica, pid, df = TRUE)
```

## Arguments

<code>mica</code>	A Mica object
<code>pid</code>	Data access request identifier
<code>df</code>	Return a data.frame (default is TRUE)

## See Also

Other data access requests functions: [mica.dar.actions](#), [mica.dar.amendment.form](#), [mica.dar.amendment.history](#), [mica.dar.amendments](#), [mica.dar.amendment](#), [mica.dar.form](#), [mica.dar.history](#), [mica.dars](#), [mica.dar](#)

## Examples

```
## Not run:  
m <- mica.login("someuser", "somepassword", "https://mica-demo.obiba.org")  
mica.dar.amendments.history(m, "12345")  
mica.logout(m)  
  
## End(Not run)
```

---

`mica.dar.form`      *Get the data access request form*

---

## Description

Get the data access request form.

## Usage

```
mica.dar.form(mica)
```

## Arguments

<code>mica</code>	A Mica object
-------------------	---------------

## See Also

Other data access requests functions: `mica.dar.actions`, `mica.dar.amendment.form`, `mica.dar.amendment.history`, `mica.dar.amendments.history`, `mica.dar.amendments`, `mica.dar.amendment`, `mica.dar.history`, `mica.dars`, `mica.dar`

## Examples

```
## Not run:
m <- mica.login("someuser", "somepassword", "https://mica-demo.obiba.org")
mica.dar.form(m)
mica.logout(m)

## End(Not run)
```

`mica.dar.history`      *Get data access request history*

## Description

Get the history of a specific data access request.

## Usage

```
mica.dar.history(mica, id, df = TRUE)
```

## Arguments

<code>mica</code>	A Mica object
<code>id</code>	Data access request identifier
<code>df</code>	Return a data.frame (default is TRUE)

## See Also

Other data access requests functions: `mica.dar.actions`, `mica.dar.amendment.form`, `mica.dar.amendment.history`, `mica.dar.amendments.history`, `mica.dar.amendments`, `mica.dar.amendment`, `mica.dar.form`, `mica.dars`, `mica.dar`

## Examples

```
## Not run:
m <- mica.login("someuser", "somepassword", "https://mica-demo.obiba.org")
mica.dar.history(m, "12345")
mica.logout(m)

## End(Not run)
```

---

mica.dars                    *Get the data access requests*

---

## Description

Get the data access requests.

## Usage

```
mica.dars(mica, status = NULL, df = TRUE)
```

## Arguments

mica	A Mica object
status	Filter by status
df	Return a data.frame (default is TRUE)

## See Also

Other data access requests functions: [mica.dar.actions](#), [mica.dar.amendment.form](#), [mica.dar.amendment.history](#), [mica.dar.amendments.history](#), [mica.dar.amendments](#), [mica.dar.amendment](#), [mica.dar.form](#), [mica.dar.history](#), [mica.dar](#)

## Examples

```
## Not run:  
m <- mica.login("someuser", "somepassword", "https://mica-demo.obiba.org")  
mica.dars(m)  
mica.logout(m)  
  
## End(Not run)
```

---

mica.datasets                    *Get the datasets*

---

## Description

Get the datasets

## Usage

```
mica.datasets(mica, query = "dataset()", select = list("*"),  
sort = list("id"), from = 0, limit = 10000, locale = "en",  
df = TRUE)
```

## Arguments

<code>mica</code>	A Mica object
<code>query</code>	The search query
<code>select</code>	The fields to be extracted
<code>sort</code>	The fields to sort by
<code>from</code>	From item
<code>limit</code>	Max number of items
<code>locale</code>	The language for labels (default is "en")
<code>df</code>	Return a data.frame (default is TRUE)

## Examples

```
## Not run:
m <- mica.login("https://mica-demo.obiba.org")
mica.datasets(m, query="variable(in(Mlstr_area.Lifestyle_behaviours,Drugs))")
mica.logout(m)

## End(Not run)
```

`mica.login`

*Open connection with Mica*

## Description

Open a connection with Mica and returns a Mica object.

## Usage

```
mica.login(username = getOption("mica.username", "anonymous"),
           password = getOption("mica.password", "password"),
           url = getOption("mica.url"), opts = getOption("mica.opts", list()))
```

## Arguments

<code>username</code>	User name in mica. Can be provided by "mica.username" option.
<code>password</code>	User password in mica. Can be provided by "mica.password" option.
<code>url</code>	Mica url or list of mica urls. Can be provided by "mica.url" option.
<code>opts</code>	Curl options. Can be provided by "mica.opts" option.

## Value

A Mica object.

## Examples

```
## Not run:  
# login using credentials from mica.username and mica.password options  
m <- mica.login("https://mica-demo.obiba.org")  
# login by providing credentials  
m <- mica.login("administrator", "password", "https://mica-demo.obiba.org")  
  
## End(Not run)
```

---

mica.logout

*Close connection with Mica*

---

## Description

Close connection and release resources of Mica.

## Usage

```
mica.logout(mica)
```

## Arguments

mica	A Mica object
------	---------------

## Examples

```
## Not run:  
m <- mica.login("https://mica-demo.obiba.org")  
mica.logout(m)  
  
## End(Not run)
```

---

mica.networks

*Get the networks*

---

## Description

Get the networks

## Usage

```
mica.networks(mica, query = "network()", select = list("*"),  
sort = list("id"), from = 0, limit = 100, locale = "en",  
df = TRUE)
```

## Arguments

<code>mica</code>	A Mica object
<code>query</code>	The search query
<code>select</code>	The fields to be extracted
<code>sort</code>	The fields to sort by
<code>from</code>	From item
<code>limit</code>	Max number of items
<code>locale</code>	The language for labels (default is "en")
<code>df</code>	Return a data.frame (default is TRUE)

## Examples

```
## Not run:
m <- mica.login("https://mica-demo.obiba.org")
mica.networks(m, query="network(in(Mica_network.studyIds,clsa))")
mica.logout(m)

## End(Not run)
```

`mica.studies`

*Get the studies*

## Description

Get the studies

## Usage

```
mica.studies(mica, query = "study()", select = list("acronym", "name",
  "objectives", "model",
  "populations.dataCollectionEvents.model.dataSources"),
  sort = list("id"), from = 0, limit = 100, locale = "en",
  df = TRUE)
```

## Arguments

<code>mica</code>	A Mica object
<code>query</code>	The search query
<code>select</code>	The fields to be extracted
<code>sort</code>	The fields to sort by
<code>from</code>	From item
<code>limit</code>	Max number of items
<code>locale</code>	The language for labels (default is "en")
<code>df</code>	Return a data.frame (default is TRUE)

## See Also

Other studies functions: [mica.study.dces](#), [mica.study.populations](#)

## Examples

```
## Not run:  
m <- mica.login("https://mica-demo.obiba.org")  
mica.studies(m, query="variable(in(Mlstr_area.Lifestyle_behaviours,Drugs))",  
  locale="en", from=0, limit=10)  
mica.logout(m)  
  
## End(Not run)
```

---

**mica.study.dces**

*Get the study data collection events*

---

## Description

Get the study data collection events (DCEs). Note that the DCEs are not fetched directly, they are extracted from study search results.

## Usage

```
mica.study.dces(mica, query = "study()",  
  select = list("populations.dataCollectionEvents"), sort = list("id"),  
  from = 0, limit = 100, locale = "en", df = TRUE)
```

## Arguments

<code>mica</code>	A Mica object
<code>query</code>	The search query
<code>select</code>	The fields to be extracted
<code>sort</code>	The fields to sort by
<code>from</code>	From item
<code>limit</code>	Max number of items. Note that this limit applies to the studies that are fetched, the resulting count of DCEs will be higher.
<code>locale</code>	The language for labels (default is "en")
<code>df</code>	Return a data.frame (default is TRUE)

## See Also

Other studies functions: [mica.studies](#), [mica.study.populations](#)

## Examples

```
## Not run:
m <- mica.login("https://mica-demo.obiba.org")
mica.study.dces(m, query="study(in(Mica_study.methods-design,cohort_study))")
mica.logout(m)

## End(Not run)
```

**mica.study.populations**

*Get the study populations*

## Description

Get the study populations. Note that the populations are not fetched directly, they are extracted from study search results.

## Usage

```
mica.study.populations(mica, query = "study()",  
  select = list("populations.name", "populations.description",  
    "populations.model"), sort = list("id"), from = 0, limit = 100,  
  locale = "en", df = TRUE)
```

## Arguments

<code>mica</code>	A Mica object
<code>query</code>	The search query
<code>select</code>	The fields to be extracted
<code>sort</code>	The fields to sort by
<code>from</code>	From item
<code>limit</code>	Max number of items. Note that this limit applies to the studies that are fetched, the resulting count of populations will be higher.
<code>locale</code>	The language for labels (default is "en")
<code>df</code>	Return a data.frame (default is TRUE)

## See Also

Other studies functions: [mica.studies](#), [mica.study.dces](#)

## Examples

```
## Not run:
m <- mica.login("https://mica-demo.obiba.org")
mica.study.populations(m, query="study(in(Mica_study.methods-design,cohort_study))")
mica.logout(m)

## End(Not run)
```

---

mica.taxonomies      *Get the taxonomies*

---

### Description

Get the taxonomies, optionally filtered by taxonomy name and by term matching.

### Usage

```
mica.taxonomies(mica, query = NULL, locale = "en",
                 target = "variable", taxonomies = NULL, df = TRUE)
```

### Arguments

mica	A Mica object
query	The search query
locale	The language for labels (when NULL labels are not included in the result)
target	What the taxonomy is about: variable (default), dataset, study, network
taxonomies	Taxonomy names to subset. If NULL or empty all taxonomies are returned
df	Return a data.frame (default is TRUE)

### See Also

Other taxonomies functions: [mica.vocabularies](#)

### Examples

```
## Not run:
m <- mica.login("https://mica-demo.obiba.org")
mica.taxonomies(m, target="variable", query="sex", locale="en",
                taxonomies = list("Mlstr_area", "Mlstr_additional"))
mica.logout(m)

## End(Not run)
```

---

mica.variables      *Get the variables*

---

### Description

Get the variables

**Usage**

```
mica.variables(mica, query = "variable()", select = list("*"),
  sort = list("id"), from = 0, limit = 10000, locale = "en",
  df = TRUE)
```

**Arguments**

<code>mica</code>	A Mica object
<code>query</code>	The search query
<code>select</code>	The fields to be extracted
<code>sort</code>	The fields to sort by
<code>from</code>	From item
<code>limit</code>	Max number of items
<code>locale</code>	The language for labels (default is "en")
<code>df</code>	Return a data.frame (default is TRUE)

**Examples**

```
## Not run:
m <- mica.login("https://mica-demo.obiba.org")
mica.variables(m, query="variable(in(Mlstr_area.Lifestyle_behaviours,Drugs))")
mica.logout(m)

## End(Not run)
```

**mica.vocabularies**      *Get the vocabularies*

**Description**

Get the taxonomy vocabularies, optionally filtered by taxonomy name and by term matching.

**Usage**

```
mica.vocabularies(mica, query = NULL, locale = "en",
  target = "variable", taxonomies = NULL, df = TRUE)
```

**Arguments**

<code>mica</code>	A Mica object
<code>query</code>	The search query
<code>locale</code>	The language for labels (when NULL labels are not included in the result)
<code>target</code>	What the taxonomy is about: variable (default), dataset, study, network
<code>taxonomies</code>	Taxonomy names to subset. If NULL or empty all taxonomies are returned
<code>df</code>	Return a data.frame (default is TRUE)

**See Also**

Other taxonomies functions: [mica.taxonomies](#)

**Examples**

```
## Not run:  
m <- mica.login("https://mica-demo.obiba.org")  
mica.vocabularies(m,target="variable", query="cancer", locale = "en")  
mica.logout(m)  
  
## End(Not run)
```
