

# Package ‘ralger’

July 24, 2020

**Type** Package

**Title** Easy Web Scraping

**Version** 2.0.1

**Maintainer** Mohamed El Fodil Ihaddaden <ihaddaden.fodeil@gmail.com>

**Description** The goal of 'ralger' is to facilitate web scraping in R.

The user has the ability to extract a vector with `scrap()`, a tidy dataframe using `tidy_scrap()`, a table with `table_scrap()` and web links with `weblink_scrap()`.

**License** MIT + file LICENSE

**Encoding** UTF-8

**LazyData** true

**URL** <https://github.com/feddelegrand7/ralger>

**BugReports** <https://github.com/feddelegrand7/ralger/issues>

**VignetteBuilder** knitr

**Imports** magrittr, rvest, xml2, testthat, tidyr, dplyr, stringr,  
robotstxt, crayon, purrr

**Suggests** knitr, rmarkdown

**RoxygenNote** 7.1.1

**NeedsCompilation** no

**Author** Mohamed El Fodil Ihaddaden [aut, cre],  
Ezekiel Ogundepo [ctb]

**Repository** CRAN

**Date/Publication** 2020-07-24 04:10:02 UTC

## R topics documented:

paragraphs_scrap . . . . .	2
scrap . . . . .	2
table_scrap . . . . .	3
tidy_scrap . . . . .	4
titles_scrap . . . . .	5
weblink_scrap . . . . .	5

**Index**[7](#)

---

paragraphs_scrap	<i>Website text paragraph scraping</i>
------------------	--

---

**Description**

This function is used to scrape text paragraphs from a website.

**Usage**

```
paragraphs_scrap(link, contain = NULL, collapse = FALSE, askRobot = FALSE)
```

**Arguments**

link	the link of the web page to scrape
contain	filter the paragraphs according to the character string provided.
collapse	if TRUE the paragraphs will be collapsed into one element and the contain argument ignored.
askRobot	logical. Should the function ask the robots.txt if we're allowed or not to scrap the web page ? Default is FALSE.

**Value**

a character vector.

**Examples**

```
# Extracting the paragraphs displayed on the health topic of the New York Times
link <- "https://www.nytimes.com/section/health"
paragraphs_scrap(link)
```

---

scrap	<i>Simple website scraping</i>
-------	--------------------------------

---

**Description**

This function is used to scrape one element from a website.

**Usage**

```
scrap(link, node, clean = FALSE, askRobot = FALSE)
```

**Arguments**

link	the link of the web page to scrape
node	the HTML or CSS element to consider, the SelectorGadget tool is highly recommended
clean	logical. Should the function clean the extracted vector or not ? Default is FALSE.
askRobot	logical. Should the function ask the robots.txt if we're allowed or not to scrape the web page ? Default is FALSE.

**Value**

a character vector

**Examples**

```
# Extracting imdb top 250 movie titles

link <- "https://www.imdb.com/chart/top/"
node <- ".titleColumn a"

scrap(link, node)
```

---

table_scrap	<i>HTML table scraping</i>
-------------	----------------------------

---

**Description**

This function is used to scrape an html table from a website.

**Usage**

```
table_scrap(link, choose = 1, header = T, askRobot = FALSE, fill = FALSE)
```

**Arguments**

link	the link of the web page containing the table to scrape
choose	an integer indicating which table to scrape
header	do you want the first line to be the leader (default to TRUE)
askRobot	logical. Should the function ask the robots.txt if we're allowed or not to scrape the web page ? Default is FALSE.
fill	logical. Should be set to TRUE when the table has an inconsistent number of columns.

**Value**

a data frame object.

**Examples**

```
# Extracting premier ligue 2019/2020 top scorers

link    <- "https://www.topscorersfootball.com/premier-league"
table_scrap(link)
```

---

tidy_scrap	<i>Website Tidy scraping</i>
------------	------------------------------

---

**Description**

This function is used to scrape a tibble from a website.

**Usage**

```
tidy_scrap(link, nodes, colnames, clean = FALSE, askRobot = FALSE)
```

**Arguments**

link	the link of the web page to scrape
nodes	the vector of HTML or CSS elements to consider, the SelectorGadget tool is highly recommended.
colnames	the names of the expected columns.
clean	logical. Should the function clean the extracted tibble or not ? Default is FALSE.
askRobot	logical. Should the function ask the robots.txt if we're allowed or not to scrape the web page ? Default is FALSE.

**Value**

a tidy data frame.

**Examples**

```
# Extracting imdb movie titles and rating

link    <- "https://www.imdb.com/chart/top/"
my_nodes <- c(".titleColumn a", "strong")
names   <- c("title", "rating")

tidy_scrap(link, my_nodes, names)
```

---

titles_scrap	<i>Website title scraping</i>
--------------	-------------------------------

---

**Description**

This function is used to scrape titles from a website. Useful for scraping daily electronic newspapers' titles.

**Usage**

```
titles_scrap(link, contain = NULL, askRobot = FALSE)
```

**Arguments**

link	the link of the web page to scrape
contain	filter the titles according to the character string provided.
askRobot	logical. Should the function ask the robots.txt if we're allowed or not to scrape the web page ? Default is FALSE

**Value**

a character vector

**Examples**

```
# Extracting the current titles of the New York Times  
link <- "https://www.nytimes.com/"  
titles_scrap(link)
```

---

weblink_scrap	<i>Website web links scraping</i>
---------------	-----------------------------------

---

**Description**

This function is used to scrape web links from a website.

**Usage**

```
weblink_scrap(link, contain = NULL, askRobot = FALSE)
```

**Arguments**

link	the link of the web page to scrape
contain	filter the web links according to the character string provided.
askRobot	logical. Should the function ask the robots.txt if we're allowed or not to scrape the web page ? Default is FALSE.

**Value**

a character vector.

**Examples**

```
# Extracting the web links within the World Bank research and publications page  
link <- "https://www.worldbank.org/en/research"  
  
weblink_scrap(link)
```
