svDialogstcltk-package
SciViews GUI API - Dialog boxes using Tcl/Tk

Description

Use Tcl/Tk dialog boxes for your GUI.

Details

Package: svDialogstcltk
Type: Package
Version: 0.9-4
Date: 2014-03-02
License: GPL 2 or above, at your convenience

This package provides a Tcl/Tk alternative to dialog boxes implemented in the svDialogs package. There is no function for direct use, but methods implementing the various `dlgXXX()` functions of svDialogs.

When the package is loaded, it inserts a new `tcltkGUI` dependency in the `.GUI` object (if it is not defined yet). That way, every call to `.GUI` dispatches first to the current Tcl/Tk implementation of the dialog boxes. For your own, separate GUI (say called `myGUI`), you have to create the binding by yourself by calling `guiWidgets(myGUI) <- "tcltkGUI"`.
