swagger-package	<i>swagger: Dynamically Generates Documentation from a Swagger-Compliant API</i>
-----------------	--

---

### Description

Swagger is a collection of HTML, Javascript, and CSS assets that dynamically generate beautiful documentation from a Swagger-compliant API.

### Details

The main purpose of this package is to enable package authors to create APIs that are compatible with <https://swagger.io/> and <https://www.openapis.org/>.

To learn more about Swagger visit: <https://swagger.io/swagger-ui/>

### Author(s)

**Maintainer:** Javier Luraschi <javier@rstudio.com>

Authors:

- SmartBear Software [copyright holder]

Other contributors:

- RStudio [copyright holder]

---

swagger_index	<i>Path to Swagger Index</i>
---------------	------------------------------

---

### Description

Retrieves the path to the swagger index file.

### Usage

```
swagger_index()
```

**Examples**

```
if (interactive()) {  
  browseURL(swagger_index())  
} else {  
  print(paste("You can use swagger under: ", swagger_index()))  
}
```

---

swagger_path	<i>Path to Swagger Resources</i>
--------------	----------------------------------

---

**Description**

Retrieves the path to swagger resources.

**Usage**

```
swagger_path()
```

**Examples**

```
if (interactive()) {  
  browseURL(swagger_path())  
} else {  
  print(paste("You can explore swagger resources under: ", swagger_path()))  
}
```
